MAY 0 5 2006 8

Revised listing of Claims:

1 (Currently amended). A buoyant, non-corrosive, tasteful wrench, comprising:

a first engagement end having a first engagement region;

a body positioned adjacent to said first engagement end, said body incorporating a reflective material; and

A second engagement end having a second engagement region, said second engagement end positioned adjacent to said body and opposite said first engagement end.

Claim 2 (Original) The buoyant wrench according to claim 1 wherein said buoyant wrench has a specific gravity of less than 1.0.

Claim 3 (Currently amended) The buoyant wrench according to claim 1 wherein said reflective material is positioned on said body to reflect light from a light source.

Claim 4 (Cancelled).

Claim 5 (Currently amended) The buoyant wrench according to claim 1 wherein said reflective material includes a luminescent material, resistant to corrosion and is tasteful when held orally.

Claim 6 (Currently amended) a buoyant, non-corrosive, tasteful wrench, comprising:

An engagement end having an engagement region; and a body positioned adjacent

to said engagement end, said body incorporating <u>a reflective material</u> and composed of <u>a</u> corrosive resistant material.

Claim 7 (Original). The buoyant wrench according to claim 6 wherein said wrench has a specific gravity less than 1.0.

Claim 8 (Currently amended) The buoyant wrench according to claim 6 wherein said reflective material is positioned on said body to reflect light from a light source.

Claim 9 (Cancelled)..

Claim 10 (Currently amended) The buoyant wrench according to claim 6 wherein said <u>reflective material</u> includes a luminescent material, said <u>corrosive resistant material</u> will not rust and said material will be <u>pleasant to the taste buds</u> when held orally.

Claim 11 (Original) A method for forming a buoyant wrench, said method including the steps of:

positioning an engagement end having an engagement region adjacent to a body; and

incorporating a reflective material in said body.

Claim 12 (New) A buoyant, corrosive resistant, lanyard attachment, pleasant to the taste buds wrench,

comprising:

a first engagement end having a first engagement region;

a body positioned adjacent to said first engagement end,

a second engagement end having a second engagement region, said engagement end positioned adjacent to said body and opposite said first engagement end,

a third engagement end having a third engagement region positioned adjacent to said body and on the adjacent end of said body,

a fourth engagement end having a fourth engagement region positioned adjacent to said body and opposite second engagement end.

Claim 13 (New) The buoyant wrench according to claim 12 wherein said buoyant wrench has a specific gravity of less than 1.0.

Claim 14 (New) The buoyant wrench according to claim 12 wherein said <u>reflective</u>

<u>material</u> is positioned on said body to reflect light from a light source.

Claim 15 (New) The buoyant wrench according to claim 12 wherein said is made of a material the is resistant to corrosion. and tasteful (pleasant to the taste buds).

Claim 16 (New) The buoyant wrench according to claim 12 wherein said reflective material includes a luminescent material.

Claim 17 (New) A buoyant, corrosive resistant, reflective, pleasant to the taste buds, lanyard attachment wrench comprising:

a body to which is attached at one end three engagement ends, each with an engagement area,

and three more engagement ends each with engagement areas attached to the body at its other end.

Claim 18 (New) The buoyant wrench according to claim 17 wherein said buoyant wrench has a specific gravity of less than 1.0.

Claim 19 (New) The buoyant wrench according to claim 17 wherein said <u>reflective</u>

<u>material</u> is positioned on said body to reflect light from a light source.

Claim 20 (New) The buoyant wrench according to claim 17 wherein said is made of a material the is <u>resistant to corrosion</u>. and <u>tasteful</u>.

Claim 21 (New) The buoyant wrench according to claim 17 wherein said <u>reflective</u> material includes a luminescent material.

Claim 22 (New) A buoyant, reflective, tasteful, corrosive resistant multi-tool in the shape of a fish, comprising:

a body in which is attached a vertical extension at one side and a second vertical

extension on the opposite side. Said body incorporating <u>a reflective material</u>, composed of a <u>corrosive resistant material</u>, and <u>tasteful</u>,

vertical extensions will then angle forward and have incorporated into the face of this extension an engagement end,

engagement ends will be of various size socket wrench types with hex design, an engagement region will be that of the shape of fish eyes with the eye balls being of a hex socket wrench design,

eyes (hex socket) will be of various sizes to accommodate different size bolt heads,

the eyes will jut out from the body (forward end of the handle) and then angle out to different degrees forward and contain the hex socket wrench type configuration,

the body of the fish will be the handle,

the handle can have a criss-cross pattern designed into its surface,

the dorsal and ventral fins will aid in gripping the wrench and prevent the hand from sliding forward,

there is a hole in the dorsal fin in which to attach a lanyard,

different fish wrenches will have different size wrenches, each fish having two sizes of the hex wrench type engagements,

the tail fin will have a standard screw driver head shaped into it,
the other tail fin will have an marlinspike type attachment,
the nose of the fish will have the shape of a Phillips screw driver engagement,
The top of the fish head will be flatten out for use as a hammer,
reflective material will be incorporated into the handle and/or fins of the fish

wrench.

Claim 23 (New) The buoyant wrench according to claim 22 wherein said buoyant wrench has a specific gravity of less than 1.0.

Claim 24 (New) The buoyant wrench according to claim 22 wherein said <u>reflective</u>

<u>material</u> is positioned on said body to reflect light from a light source.

Claim 25 (New) The buoyant wrench according to claim 22 wherein said is made of a material that is <u>resistant to corrosion</u> will not rust when expose to water.

Claim 26 (New) The buoyant wrench according to claim 22 wherein said <u>reflective</u> material includes a luminescent material.

Claim 27 (New) The buoyant wrench according to claim 22, but not design to look like a fish. A buoyant, resistant to corrosion, reflective multi-tool.

Claim 28 (New) The multi-tool according to claim 22 will be tasteful (pleasant to the taste buds).

Claim 29 (New) Tools that are buoyant, reflective, non-corrosive and tasteful (pleasant to the taste buds).
